EUCLID AVENUE AND KINGSHIGHWAY
OFFICE OF THE DEAN

January 25, 1949

Mr. Robert S. Gill
President
The Passano Foundation, Inc.
Mt. Royal and Guilford Avenues
Baltimore 2, Maryland

Dear Mr. Gill:

In my judgment the contribution of the three nominees in "recent research in the medical field, with particular reference to clinical application" is as follows.

Charles B. Huggins - 6 points
Oswald T. Avery - 2 points
Phillip Levine - 2 points

I have given almost two-thirds of the points to Dr. Huggins because his observations have a good deal more reference to clinical application in terms of the number of people involved than either of the other two. Although Dr. Avery's contributions are fundamental, they do not have the immediate clinical application that Dr. Huggins' studies do. The observations on erythroblastosis are of great interest but again do not involve any large number of individuals.

Very truly yours,

Robert A. Moore,
Dean
